Art Unit: 2622

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to scaling a video signal based on decoded old/new display parameters, classified in class 348, subclass 581 and 345/660.
 - II. Claims 9-13, drawn to a circuit for providing scaled frames using a timer/vertical sync pulse, classified in class 348, subclass 500,581.
- III. Claims 14-21, drawn to a video display engine for scaling frames based on 1st (new)/2nd(old) display parameters stored in 1st/2nd buffers, class 348, subclass 581, 715-716
- 2. Inventions of Group I and Group II,III are related as combination and subcombinations (II, III) disclosed as useable together in a single combination (I). Inventions in this relationship are distinct if it can be shown that the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and that the subcombination has utility by itself or in other combinations. The combination (Group I) discloses scaling a video signal based on decoded old/new display parameters. The combination (Group II) discloses a circuit for providing scaled frames using a timer/vertical sync pulse. In the instant case, the combinations (Group I) as claimed does not require the particulars of the subcombination (Group II, III) as claimed because the claims to both the combination and subcombination are presented and assumed to be patentable. The omission of details of the claimed subcombination (Group II, III) in the combination claim (Group Is) is evidence that the patentability of the combination does

Application/Control Number: 10/602,387 Page 3

Art Unit: 2622

not rely on the details of the specific combination. The subcombination (Groups II, III) has separate utility since the subcombination may be used for computer displays, image processing and data which may/may not be related to TV data, timing/synchronizing of data. See (MPEP 806.05(c)).

- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.43).
- 5. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Yenke whose telephone number is (571)272-7359. The examiner work schedule is Monday-Thursday, 0730-1830 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Supervisor, David L. Ometz, can be reached at (571)272-7593.

Any response to this action should be mailed to:

Application/Control Number: 10/602,387 Page 4

Art Unit: 2622

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(571)-273-8300

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is

(703)305-HELP.

General information about patents, trademarks, products and services offered by the United States Patent and Trademark Office (USPTO), and other related information is available by contacting the USPTO's General Information Services Division at:

(FAX) 703-305-7786

800-PTO-9199 or 703-308-HELP

(TDD) 703-305-7785

An automated message system is available 7 days a week, 24 hours a day providing informational responses to frequently asked questions and the ability to order certain documents. Customer service representatives are available to answer questions, send materials or connect customers with other offices of the USPTO from 8:30 a.m. - 8:00p.m. EST/EDT, Monday-Friday excluding federal holidays.

For other technical patent information needs, the Patent Assistance Center can be reached through customer service representatives at the above numbers, Monday through Friday (except federal holidays) from 8:30 a.m. to 5:00 p.m. EST/EDT.

The Patent Electronic Business Center (EBC) allows USPTO customers to retrieve data, check the status of pending actions, and submit information and applications. The tools currently available in the Patent EBC are Patent Application Information

Retrieval (PAIR) and the Electronic Filing System (EFS).

PAIR (http://pair.uspto.gov) provides customers direct secure access to their own patent application status information, as well as to general patent information publicly available. EFS allows customers to electronically file patent application documents securely via the Internet. EFS is a system for submitting new utility patent applications and pre-grant publication submissions in electronic publication-ready form. EFS includes software to help customers prepare submissions in extensible Markup Language (XML) format and to assemble the various parts of the application as an electronic submission package. EFS also allows the submission of Computer Readable Format (CRF) sequence listings for pending biotechnology patent applications, which were filed in paper form.
